Re: Counter Copyright Issue January 2024, Support ID 977385

Internet Archive,

A copy of the Counter to a Copyright Complaint from Matthew J. Trewhella, for the book, "The Doctrine Of The Lesser Magistrates will be mailed to The Internet Archive, with attention to**, Internet Archive, Support ID 977385;**
support+id977385@archivesupport.zendesk.com

UMOJA Research apologizes for any disruption in All Internet Archive Support, especially support coming from supporters of UMOJA Research, which has been disrupted by no access to umojaresearch account Digital Uploads.

Should additional information be allowed, to be added to Copyright Complaint of Support ID 977385, UMOJA Research would like to share information to All Internet Archive Employees, from the Docks, Copy Centers, Scanner Sections, Administration Offices, Technical Support and Every Supporter, from $10 Dollar to the $10 Million Dollar Supporters and above. **People may not fully realize the Positive Impact The Internet Archive has on Humanity**. So I'll share a few stories so the reader can grasp the depth of the importance The Internet Archive has on those on the very edge of Non-Existence, which you all are a part, in that support.

1. **The Old Woman**
2. **The Student Living Out of A Backpack - Sweating Studies For Finals**
3. **Veterans' in The Alley With A Single Computer For Seven Vets**
4. **Living In A Van With The Desire To Just Read A Book**
5. **Well To Do Woman Told Her Mother Will Die In Two Weeks**
6. **Access To The Truth For A Fact Checker**
7. **Seeking Spiritual Information On A Budget**
8. **Conclusion**

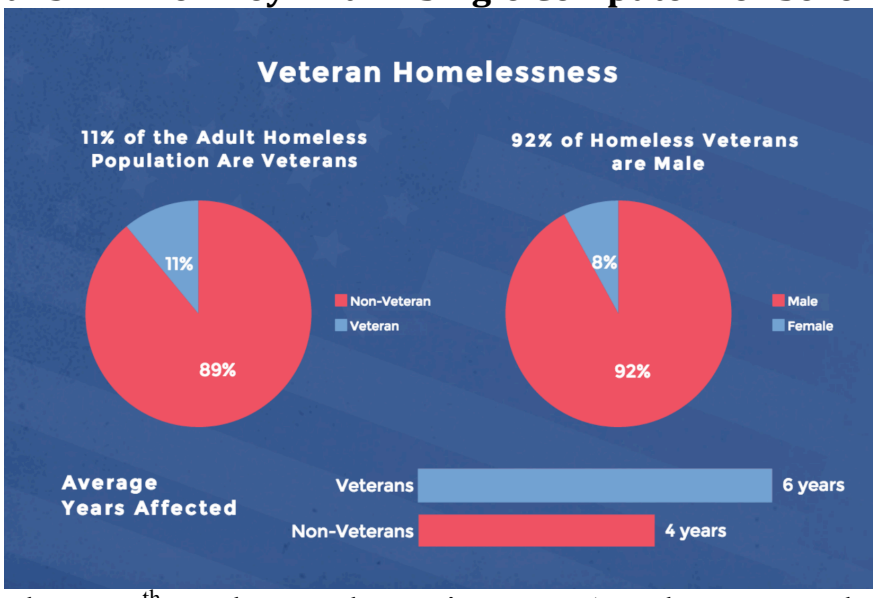
The Old Woman

Not able to find parking for a meet, I had to drive several blocks into a residential neighborhood and started walking to my location, with plenty of time. Suddenly a young woman calling from the porch Sir, Sir and as she came to the fence, I could see the Old Woman, head down, eyes drooped, face full of sadness, pity and despair. The young woman says, do you know what a Benny Goodman 78 is? I said give me more info and she said my grandmother only gets happy when she remembers her mother and says how Benny Goodman's 78 made her so happy. I said oh, Benny Goodman was a musician and a lot of his records were on 78-RPM Records. Do you have Internet on your Cell and she tried to hand it to me and I said, no you drive. Type in Archive.org and in the subject type "Benny Goodman Music. Like everybody she says we can't afford to pay anything, I said it's a Digital Library and it's Free. When Benny Goodman appears I told her to pick "Benny Goodman". (At that time you could listen to the entire song & album, not today) and play the first song and it should automatically go to the next song. When she started the song, she ran to the porch and knelt by her grandmother and said is this Benny Goodman, the Old Woman suddenly opened her eyes widely and put her hand over her mouth and I wasn't sure if she was laughing, or crying, it was a Sacred Moment and I started walking off and the girl ran to the fence, while her grandmother was in Complete Ecstasy, the girls eyes were all watered up and I told her, don't thank me, Thank Almighty GOD for you having the courage to ask and thank The Internet Archive for providing Free Music & Free Knowledge and I gave her a UMOJA Research Card. So the Essence of the story is really far beyond our comprehension, how something as simple as songs Digitized from 78-RPM Albums can bring a person from the deepest despair, to Ultimate Bliss & Happiness, it's something beyond comprehension. I learn to call it "The Magic Moment" The Internet Archive can bring into the Lives of Others. It's an Absolutely Breathtaking Moment That's Priceless. You are all part of this, I just get to actually experience what The Internet Archive can actually mean to someone who needs your Love in His or Her Life.

The Student Living Out of A Backpack - Sweating Studies For Finals

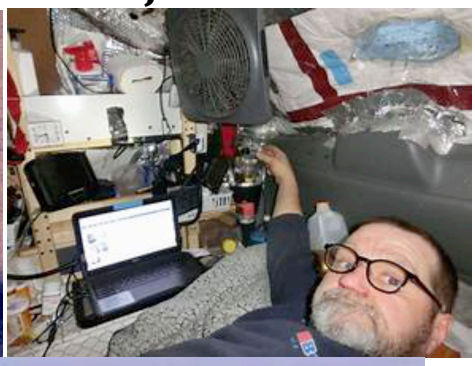
After a Lecture on Education, a Homeless Student approached and asked how I could afford Technical Books at Trade Tech for ten years. I told her we didn't have the Internet, but we had "Op-Amp Bookstore" in Hollywood, where you could purchase $95-100 Dollar Textbooks for $10 in very good condition, or $5 with lots of notes and yellow marker highlights, still readable. She looked around and said I'm Homeless and living out of my Back Pack. I asked if she had a computer and she carefully pulled out her laptop and I asked if she had Internet. She opened the Internet and was told to type in Archive.org, in the subject type in the textbook name. The textbook came up and she said that's an old revision, I said are you kidding me, is it the title and author, she said yes. Export it to your desktop, but I can't afford to pay. She was told just export it, it doesn't cost you anything, if you want to pass your Final, this should do, just talk to your teacher and be honest about your situation. We then looked for a second, but it was for members, so I explained how to establish an account and to keep in mind, you can't copy it to your desktop and you can't check it out and think you can hold it four days, there's time limits. She was given several alternatives, which worked for her. So I told her, everything good is possible, you simply have to commit to your goals and you'll succeed, no matter how difficult, if you really want to achieve something good just remain committed and accomplish your goals. With this story, which is common among a lot of students, in Lectures on Education Students were told, if it wasn't for Digital Libraries and all the people supporting them, including their employees, none of this might not be possible and the people doing it are committed to giving you Free Digital Information. So believe it, or not, Everyone's part is important in helping provide Free Knowledge, many of you have no idea, no matter how small your part, you are Saving Lives & Making People Happy.

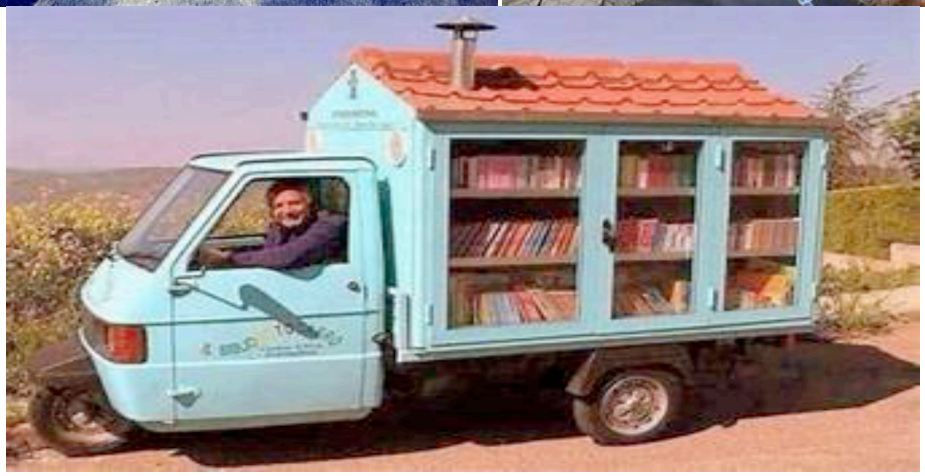
Veterans' in The Alley With A Single Computer For Seven Vets



Walking down 7th and Broadway in Los Angeles, remembering my childhood, this is one of the most dangerous places to walk, if you don't know what's up in the streets, day or night. Passing an alley someone is yelling Brother Burns, Brother Burns. So walking down to see whom it was, there's five of seven Homeless Vets, sitting in a circle on cardboard to retain their heat and I ask what's up? The Veteran remembered me at Trade Tech, helping Veterans with Tool Purchases. He said there's seven of us, this is where we live and we take turns with guard duty to watch out while the others are sleeping and we share the computer for emails, personal business and music. One of the other Vets said yea, but our CD Player took a dump. After asking if they had Internet, it was Hell Yea. So I said whose music day is it, if I can get it up and running, they said yours, play us a tune. Open Archive.org. After typing in James Taylor and selecting **The Best Of James Taylor**, the selection for that moment was, **"Shower The People"** and the Vets looked at one another when the music started in complete amazement, one dropped his head and it was just another **"Magical Moment"** that really can't be comprehended, or expressed in words. The Vet who recognized me said, hey Brother Burns, No Drugs, No Alcohol, No Arguments, we're just family, the same as we were in Nam. We all spoke and I told them it's getting late, see you on the next go-round. **So these "Magical Moments" have real meaning, far, far beyond what any of us can fathom, but what's really important is to try and understand, everyone involved with Digital Libraries', The Internet Archive and no matter what your job may be, you really make a Meaningful Difference in the Lives of People Who Really Need It. Personally, I've witnessed it many times.**

Living In A Van With The Desire To Just Read A Book





When people who live in Vans, Cars and Trucks learn they can find Free Books on the Internet Archive and other Digital Archives, their Lives are changed forever, with Hope. Meeting people living in vehicles was always interesting, but when you share the idea of using their Computers & Laptops to find Suppressed Health Cures & Remedies on Archive.org on umojaresearch, people who are deathly afraid of doctors and hospitals, actually breath new life and are extremely thankful. You never realize how fortunate you are until you hear some of their stories. One lady, Homeless, living in her car said, One Night in Loma Linda Hospital cost her $30,000.00 and wanted to show proof. But when she was able to read about the Cancer Cures and the Doctors, Biochemist and people who Cured Every Disease Known To Man by 1935, she just kept thanking me, but I told her to thank The Internet Archive, even if she couldn't donate, just send an Email of Thanks. Once you realize the large numbers of Homeless situations and how much these people appreciate the fact they can Read Books, Listen to Music, even find Recipes', it becomes another "Magical Moment". Because many of us have a roof over our heads, can eat regularly, wearing clean cloths & shoes and can take a Bath Regularly, not once a week out of a bucket.

"BLESSINGS TO ALL WORTHY OF BEING BLESSED"

Well To Do Woman Told Her Mother Will Die In Two Weeks

In Downtown Los Angeles near Union Station, many of the "Well To Do", as we call them, lives in Lofts near High End Breakfast Restaurants, which Police, & Technicians visit for the good food. One morning it was a packed house and there was a lady by the window with the only seat left available. She was in that place where I saw the Old Woman, deep in Trance. I asked, may I sit here and she looked at me in a daze and nodded her head yes. After a while I asked if she was ok, she looked up and she was worried about her mother, who doctors suggested, if she doesn't have the Treatments She'll Die In Two Weeks. Hearing this story many times, I let her get some of the pain out. She then asked my opinion and I told her I wasn't a Doctor and Do Not Give Medical Advice. However, if she went on the Internet to archive.org/details/@umojaresearch, She could find the people who cured every disease known to man by 1935. She pulled out her Cell Phone and was shown some of the more important people, whose cures were known to work and she rushed out with the UMOJA Research Card. Several months later someone says Mr. Burns and it was this woman. Her eyes were beaming, so I assumed there was no bad news, I came here several times to find you, She said her mother was recovering well and she wanted to Zelle me some money and I told her thank you, but I can't accept any money, maybe one day UMOJA Research will have a Foundation and you can support that, but she could give support to The Internet Archive for allowing me to upload the Digital Information that helped her. She said, let me get you a refill and I said, thanks but I have to get back to work. So here was a person who was desperate to save her mother, while she was "Well To Do", possibly living with guilt she hadn't done enough for her mother. But she took the time to read what Doctors & Biochemist had to say and was able to make a difference in her mothers life, by helping her mother with the Digital Information on The Internet Archive, which her mother was willing to try, since she Refused Conventional Treatment. So People at some point, in every walk of Life is somehow improved, with Love & Happiness, because of "What You All Do!

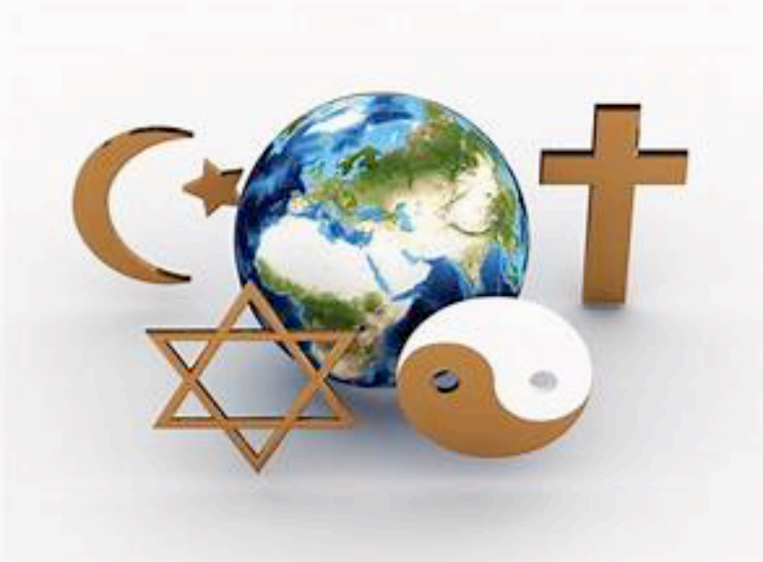
Access To The Truth For A Fact Checker

It's not unusual for a Private Health Researcher to be Heckled, or Challenged by the supposed "Fact Checkers", many who are financed by the Philanthropist, Pharmaceuticals Industries and Medical Industries, who together offer Millions of Dollars to Universities all too willing to support whatever ideas they present, even at the expense of Human Life. Should they offer Millions of Dollars to introduce their PhD Professors as Instructors, the Universities simply can't resist the money.

In a Lecture for Professor Thurman Robinson of Los Angeles Trade Technical College, a "Fact Checker" chose to interrupt the Lecture, blurting out Dr. Strecker was a fraud and everything I was saying was not true. When she finished ranting, I asked if she was willing to actually Disprove The Documentation, Audio, and Video, seeing you suggest you are an experienced and qualified Liberian. She had no choice but to agree, seeing some of her peers were supporting her position. So I gave her a copy of the Video Tape, "The Strecker Memorandum", the Historical Document, **"This Is A Bio-Attack Alert"** and Audio Tape Interviews of Dr. Strecker, in the presence of everyone in the Lecture.

Several months later, Professor Robinson called me for a visit and suggested the woman who disrupted the Lecture came to his office to apologize. He asked her what the apology was for, when she explained, he told her she should be apologizing to John Burns of UMOJA Research, not to him and asked what did you find? She said after going through the material, with help, all the documents were real and at least one professor suggested she should be careful calling people like Robert B Strecker M.D., with a PhD in Pharmacology a Fraud, because he exposed the Truth About AIDS, Vaccinations Programs and the fact he was qualified to say, "There Is No Proof Any Vaccines Cure Anything', especially because of his qualifications and that the Researcher was simply providing Facts to those concerned. She never contacted me, but I really don't look for apologies' from anyone.

Seeking Spiritual Information On A Budget



After an Education and Health Lecture, a woman approached me and went into the subject of Religions. This was brought on by my comments about a Brilliant English Instructor at Los Angeles Trade Technical College named Professor Radamaker, the most feared English Instructor on Campus, because of his method of making you think. In addition to English, he taught "The Bible As Literature". The woman expressed her desire to better understand Religions, but couldn't afford the Books. I gave her a card and told her to go to The Internet Archive and look for the Folder Titled, "HEALTH – ESOTERIC – OCCULT – SPIRITUAL". She looks at the card and says, there's no phone number or Email Address and I said, what are you looking for me, or the Religious information? Nearly six months later, here comes this woman at a noontime Lecture and she's just overwhelmed by what she found and she introduces me to her friend, who was also excited by the information being uploaded to The Internet Archive. They both were thanking me and I told them, Thank The Internet Archive for allowing me to upload that Digital Information, in Audio, Books & Videos.

The Moral of the story is, The Internet Archive, it's Supporters and Everyone involved in Providing Free Digital Information has literally changed the lives of people who simply cannot afford, Books and other forms of Digital Information, which they can access in the privacy of their Homes, Cars, Vans, or Tents, which actually has a Positive Effect on their lives. The friend of this woman was actually excited about Recipes she found from all over the world and Crafts her grandmother taught her. My thought was, it's so unbelievable how the Lives of People can change for the better, with Free Digital Access to Books, Audio, Video and other forms of Digital Information. It's like The New Frontier of Free Knowledge For Humanity.

Hopefully The Internet Archive & its Supporters will overcome those attempting to Suppress Free Knowledge. The Positive Impact is just Incomprehensible.

"BLESSINGS TO ALL WORTHY OF BEING BLESSED"

Conclusion

In Conclusion, John Burns of UMOJA Research, using the Account umojaresearch to upload Digital Audio, Books, Video & other Digital Information to The Internet Archive Sincerely Apologizes to All Employees & Supporters of The Internet Archive for having a Copyright Complaint Filed. Any Copyright Complaint has the potential to reduce the financial support of those who can no longer access Digital Information of interest, due to a Locked Folder, or Locked Account. For that Complaint, I sincerely apologize because it has a negative impact on the bottom line of The Internet Archive and all financial support, including employment pay of every employee and keeping the Servers Running & Lights On.

As a Private Health Researcher, I hope The Internet Archive, its supporters and associates', such as Anna's Archive, Z-Library, Libgen, Sci-Hub, Public & Digital Libraries, along with everyone else supporting your cause Legally, will hopefully come together as some sort of Free Knowledge Society, or Digital Library Society, willing to materialize into something permanent, working in the Best Interest of Humanity. What should be important is to not allow the Society to be infiltrated, or Deceived with Gifts of Philanthropist, infiltrating the Society with Professors and their supposed authority because of their status of PhD Positions. If you look at Modern Medicine, you have Scientists, Doctors, Pediatricians' and Nurses, standing with their Stethoscopes around their necks, arms folded as though they are the only authority of Human Health, which is Not True, supported by Medical Societies funded with our Tax Dollars. If the supporters actually read the Historical Document "This Is a Bio-Attack Alert", March 28, 1986 by Robert B Strecker M.D, with a PhD in Pharmacology and the supporting document "The Strecker Group Reference List", it's all too obvious Modern Medicine and the Medical Societies have completely deceived Humanity. For those of you who Knowingly, or Unknowingly support the Lies & Deceit, you only need to view a three minute video in the Folder Titled "What's Killing People"? And watch the video "20 Million Dead From The Jab", the Research of Peter Halligan, from 2022, or look up Molecular Biologist Dr. Janci Chunn Lindsay who said, "We Could Be Sterilizing An Entire Generation". But many people, some paid, while others taking the advice of Medical Professors and Doctors, fully support Experimental Medicine, the cause of Injuries and Death of the Unborn, Infants, Babies, Children, Adolescents', Teenagers, Young Adults, their Parents, Grandparents and the Elderly, fully supporting the Suppression of TRUTH, as Misinformation.

So what could all this mean for FREE Knowledge, or a Digital Library Society? It means if you allow the Society to become involved in being a part of anything destroying the Humanity You Intend Serve, part of that Humanity may consider you a part of the Evils Against the Very Humanity you are trying to serve!

Conclusion

To establish a Permanent Digital Library Society of Free Digital Knowledge National & International, working in the Best Interest of Humanity, you must seriously consider the following, in my opinion.

1. **<u>LEGISLATION</u> – The Laws of Legislation are today influenced by Lobbying, the Lobbyist working for Lobbies, which have tremendous influence over Politicians' within Federal, State & Local Governments. Your Society from the Universities, Corporate Boardrooms, to the Courtrooms would have to be a permanent part of your Society to Not Succeed, but "<u>TO NOT FAIL</u>", in the collective efforts for Free Digital Knowledge For Humanity. Any Digital Library for Free Knowledge National & International must develop a Permanent Presence in All Legislation in the Best Interest of Humanity.**
2. **<u>DIGITAL LIBRARY LEGAL DEFENSE FUND</u> – By now the Digital Libraries know Music and Book Publishers along with some writers obviously seek "Profits Over People" and the clarity of that for UMOJA Research was to see the negative impact on the Poor, Homeless, Elderly & Physically Impaired, deprived of music, in many cases nearly a Century Old, with thirty second sound bites and Books that can only be checked out with time limits, which for the Elderly, Homeless and Physically Impaired becomes confusing in accessing that Digital Information. Legal Defence is the Sentry at the Gates of Protecting Everyone's Interest in Free Knowledge Support and Legislation.**
3. **<u>PUBLIC BROADCAST RADIO & TV</u> – The idea of Public Broadcast TV & Radio is essential to your mission, if you chose "Not To Fail", which means Students in Colleges & Universities interested in Media would need to develop Public Radio & TV Programs which work towards developing a much Broader and permanent presence supporting Free Digital Knowledge. The reward in this is the opportunity to have Special Support Programming Seeking Donations. Some programs on PBS seek financial support with four to six hours of programming with operators answering phones in the program. The advantage Digital Libraries have is the collective support of Libraries' and especially School Liberians who can send children home with Flyers of any Support Events on TV and Radio.**

4. **<u>GRANTS</u> – Organizations like Public Transportation in every State receive Billions in Federal Grants; Medical Societies receive Billions in Federal, State & Local Government Money, as well as Private Support Funding. With Digital Libraries and Free Knowledge, you should have dozens of avenues within your Society, because Libraries and Librarians' connect with it all. You have to learn every avenue available. Public Transit, City Councils, State and Federal offer Grants for Public Transportation, Public Broadcast, Homelessness, The Elderly, Students and it just goes on and on. Each organization, along with Private Corporations offer some type of Support with Grant money, you just need a department dedicated to finding out who they are and what they are willing to support. Small Organizations, with Private Support offer Free Computers and Laptops for those in need all the time. So Major Computer Manufactures have much to offer, but your IT Section must make sure Free Computers & Laptops are really Free and not some snare, where the users must pay for the use of the Operating Systems and any useful Software, because "Forever Pay", with Leasing Agreements for Applications is their New Frontier. Even Commercial TV, obeying FCC Guidelines, must offer Free Public Announcements' and deep discounts for Organizations working in Public Interests Advertising on Commercial Stations.**
5. **<u>PUBLIC ASSISTANCE</u> – The Primary Goal of the Digital Library, at Heart, is Public Assistance. So any Department under that title has the opportunity to help develop the Society of Digital Free Knowledge to students at every level and benefiting from their experiences as adults, willing to join your Team, with Technical Skills, Administrative Skills, Media and more.**
6. **<u>REACHING A MEANINGFUL GOAL</u> – Should the final goal be the establishment of Free Digital Knowledge To All, you would exceed the First Such Library In Egypt should you "NOT FAIL" in this effort and certainly have "Reached A Meaningful Goal. If you intend to reach a Goal, when you step in the Ring, you'll have to decide if you really intend to Represent Humanity with Mike Tyson Blows to the opposition, or Peewee Herman Blows, the choice is yours. But the Fact Still Remains, You Change Lives For The Better; You Really Do Make People Happy, I've Seen it!**

"BLESSINGS TO ALL WORTHY OF BEING BLESSED"

For those of you still reading, try to remember the Old Lady and more importantly, American Veterans' sitting in an alley as family, abandoned by their Government, Sharing A Computer, Listening to Free Digital Music, not 30 second sound bytes, on The Internet Archive, Living a Homeless Life, after serving America in Forever Wars. I would have played Donny Hathaway's "For All We Know", but it's NOT FREE. But if you want to "Feel The Magic" of their situation with The Internet Archive' Free Digital Music they were offered, James Taylor's song, "Shower The People", play it and imagine how the Veteran's, Homeless People who may not have bathed in a week, Students who may have to choose between a Burger, or a Book, along with the Elderly becoming Ecstatic with Free Music, Recipes', Books, Arts & Crafts, who simply Light Up with New Life, play the song and maybe, just maybe, you might feel "The Love You Gave Them", by providing Free Digital Information, Music & Knowledge .

"BLESSINGS TO ALL WORTHY OF BEING BLESSED"

John Burns UMOJA Research – Private Health Research Since 1986

"EVERY DISEASE KNOWN TO MAN WAS CURED by 1935

<u>UMOJA RESEARCH HAS NOTHING FOR SALE</u>
